

Integration Features

1. Sign On Options

CCIQ supports integration with enterprise identity providers, including Active Directory and other IAM solutions. SSO availability is possible depending on Epic configuration options.

2. Provider / Patient Syncing

CCIQ automatically updates provider data once per day and syncs any changes in the information as needed. This includes data such as provider name, NPI, speciality, etc.

CCIQ automatically updates patient data when changes are made within the Epic system (e.g., demographic data, problem list (ICD-10 code changes), allergies, medications, etc

3. Standard Integration Options via FHIR

- Demographics
- Clinical documentation
- Care plan data; medication lists, allergies & appointments

3. Standard Integration Options via FHIR (cont)
