

Integration Guide

Integration Features

Provider/Patient Syncing

CCIQ automatically updates provider data once per day and syncs any changes in the information as needed. This includes data such as provider name, NPI, speciality, etc.

CCIQ automatically updates patient data when changes are made within the Veradigm system (e.g., demographic data, problem list (ICD-10 code changes), allergies, medications, etc.

Standard Integration Options via Rest API

- Audit logs
- Care plan data: medications, allergies & appointments
- Claims creation
- Demographics
- Diagnosis codes
- Encounters
- Lab imaging results
- New Rx orders & refills
- Providers
