

CCIQ Enrollment Kickstart Program

Partner with CCIQ. Earn More, Fast

We enroll eligible patients into care programs that drive real financial results for providers.

Provider Investment

\$9.50
Per Patient

We collect a small fee, **only** when a patient consents for enrollment into a care program.

Provider Revenue

\$103
Average Revenue
Per Patient, Per
Month with CCIQ

Provider makes money from any patient in a CCIQ care program.

Your patients would benefit from care management. **The challenge is enrolling them.**

The **CCIQ Enrollment Kickstart** is our white-glove patient enrollment service to activate your eligible patients faster and accelerate Care Management revenue from day one.

Why This Matters

Patients require outreach, proper consent and accurate documentation.

Staff often lack the time to launch a program.

CCIQ solves this by adding a focused enrollment layer during the most critical phase of the program: the first 90 days.

Once a care program is off the ground, it's much easier to sustain.

The Goal: 100 Enrolled Patients In 90 Days

Why Clients Love This:

- **Simple, Risk-Free Model** – You only pay when a patient is successfully consented, activated in CCIQ, and handed off to your team.
- **Faster time-to-value** – Eligible patients move from "identified" to "activated" much faster
- **White-glove launch experience** – Your team starts with real patient volume, and blueprint for maintaining the program.

**Best Fit For
Organizations with
Limited Bandwidth**

What Counts as a Completed Enrollment?

- The patient has provided consent
- Consent is documented in CCIQ
- The patient is activated in the platform
- The patient is assigned to the appropriate program/workflow
- The patient is handed off to your care team

What We Do

Patient Outreach

Phone calls, email, SMS, and campaign-based outreach using approved workflows.

Enrollment Scripting & Objection Handling

Standardized, compliant talk tracks that clearly explain the value of Care Management to patients.

Consent Capture & Documentation

Verbal, digital, or physical consent workflows documented directly in CCIQ.

Patient Activation In CCIQ

Patients are activated with the appropriate billing type, care protocol, care manager, and supervising providers when applicable

Warm Handoff To Your Care Team

Once enrolled, patients are transitioned back to your team so your staff can focus on care delivery instead of chasing enrollment.
